

William R. Cornette, DDS, PC & Associates
Hampton, Virginia

Do Not Choose Another Dentist until You Have Read This!

Patients living in other areas have recognized our practice as a successful choice for streamlined, comfortable, great value dentistry.

Recently, on a trip to Costa Rica, Dr. Cornette had the pleasure of speaking with about 20 American patients staying at his hotel, who were having various dental procedures performed at local clinics. He listened to many of them, sharing problems they were experiencing. Among these complaints were:

Treatment Taking More Visits than the Patient was Told to Expect
Treatment Sessions Much Longer than Patient was Initially Told
Patients Experiencing Unexpected Days of Delayed Treatment
Hidden Costs & "Up-Selling" Among the Complaints

In Dr. Cornette's practice, these occurrences are very rare. After all was said and done, the majority of these patients realized their treatment was costing them more money, time, and disappointment.

There is no question our practice model is designed to save our patients unnecessary appointments, wasted chair time, and disappointments.

Our patient's investment covers our cost of providing the best quality procedures available, and at a greater value than one would find out of the country. Our value is unsurpassed because more of our patients' investment goes back into the cost of providing our procedures.

Please call our office today at (757) 827-7770 to schedule a complete evaluation. We will save you frustration, disappointment, and discomfort, while at the same time adding value and trust to your dental experience.

Why leave the country for South or Central America to have cosmetic dentistry done?
We offer crowns, bridges, and implants in as little as two visits!
